New Extendable Flatbed Trailers

Extendable Flatbed Trailers from 12 to 27 Meters

Alura Trailer offers extendable flatbed trailers ranging from 12 to 27 meters, designed to transport long and oversized loads with maximum efficiency and safety. These trailers are ideal for carrying steel structures, wind turbine blades, pipes, and other elongated cargo that cannot be transported on standard trailers. Built with a robust chassis and high-tensile steel, they provide excellent load stability even at full extension. Custom configurations with side boards, front walls, and pillar options are available, and each trailer can be equipped with mechanical, air, or hydraulic suspension depending on your road and operational requirements. Whether for domestic use or international logistics, Alura's extendable flatbed trailers ensure flexibility, durability, and compliance with transport regulations worldwide.
