

## K241R Series Refrigerated Centrifuge

With its bright touchscreen LCD screen and rotor options up to 3L, K241R series offer ideal results for research laboratories.

It is ideal for research laboratories with the freedom to work with tubes in different types and capacities and with standard and refrigerated options.

- Ozone-friendly CFC free cooler (\*)
- Ease of operation with microtube and fixed angle rotors to reach and high RPMs
- 108 Program memory
- LCD display and touch key combination
- Highest security level with multi locking system
- Speed control with high speed sensor
- Autoclavable rotor advantage
